

Instructions:

- Wash your hands!
- The mask is intended for use as a surgical mask—anywhere a surgical mask would otherwise be used
- If the mask is to be used in a setting where an n95 mask would be used, it must be appropriately fit-tested and the correct filter material must be used
- Wash hands frequently, especially prior to touching/adjusting and donning/doffing your mask
- The mask can be sanitized with sani-wipes, bleach wipes, or in the CDC recommended bleach solution (<https://www.cdc.gov/coronavirus/2019-ncov/prepare/cleaning-disinfection.html>). We encourage you to cleanse your mask frequently
- Wash your hands! (Hand washing may turn out to be more preventative than anything else we do, including the use of facemasks)
- If using the green filter, the smooth side should be toward your face, loose side toward the world
